EDUCATION

Vellore Institute of Technology Bhopal, India

Bachelor of Technology in Computer Science and Engineering *Aug 2023 – Apr 2027*

- CGPA: 8.97/10

EXPERIENCE

Satisfaction Drivers Pvt. Ltd. Remote

Full Stack Developer Intern *May 2026 – Oct 2026*

- Develop full-stack marketplace applications using React.js, Node.js, and REST APIs, implementing modular backend workflows, input validation, and application features.
- Engineered a Monday.com–Google Sheets Smart Sync integration using Google OAuth and REST APIs, implementing field mapping, schema snapshots, and schema-drift detection to identify structural changes.
- Implemented synchronization and repair workflows with state refresh, error handling, operation logging, and monitoring across board, item, dashboard, and workspace views to support data consistency and reliable integrations.

TECHNICAL SKILLS

- **Programming & Core CS:** Java, JavaScript, SQL, Data Structures and Algorithms, Object-Oriented Programming, DBMS
- **Data & Databases:** PostgreSQL, MongoDB, SQL, Database Design, Data Analysis
- **AI & Automation:** Generative AI, Prompt Engineering, Workflow Automation
- **Frontend & Development Tools:** React.js, HTML5, CSS3, Git, GitHub, Node.js, Express.js

PROJECTS

TaskFlow AI – AI-Powered Software Planning Platform | ***React, TypeScript, Node.js, Express, Gemini API*** GitHub

- Built a full-stack AI application that converts natural-language software ideas into structured blueprints covering requirements, architecture, API specifications, database schemas, and implementation plans.
- Integrated the Gemini API through a Node.js and Express backend to generate AI-assisted planning outputs for a React and TypeScript interface.
- Organized blueprint creation and viewing into dedicated application routes to support structured software planning workflows.

Limit Order Book Simulator | ***Python, Data Analysis, Matplotlib*** GitHub

- Built a limit order book simulator that processes market and limit orders using price-time priority to match buy and sell orders.
- Tested the simulator on 8,000+ market events and analyzed trading results across 4,600+ trades to evaluate its performance.
- Calculated trading metrics such as profit and loss (P&L), inventory, drawdown, bid-ask spread, and realized volatility, and created charts to study trading performance and Order Flow Imbalance (OFI).

ERP Integration Framework – Enterprise API Integration | ***Node.js, Express.js, PostgreSQL*** GitHub

- Developed a Node.js and Express.js backend with REST APIs to process SAP financial data and support communication between enterprise systems.
- Implemented JWT authentication and role-based access control to manage user permissions, along with request validation and error handling to improve API reliability.
- Connected PostgreSQL to store application data and added API documentation, health checks, and performance metrics to monitor the application's status and support testing.

CERTIFICATIONS

- SQL (Basic) Certification – HackerRank
- Advanced Software Engineering & AI Fundamentals – MPOnline
- Software Engineering Job Simulation – Electronic Arts, Forage
- Google Prompting Essentials – Google
