EXPERIENCE

Satisfaction Drivers

May 2026 – Present

Full Stack Developer Intern

- Developed scalable full-stack applications using React.js, Node.js, Express.js, MongoDB, and REST APIs in an Agile environment.
- Built reusable UI components, backend APIs, and third-party integrations for the monday.com Marketplace App following modular architecture.
- Implemented Trello API integration, debugging, testing, and version control using Git/GitHub to deliver production-ready features.

PROJECTS

ERP API Integration Framework

<https://github.com/RajaNamdeo13/erp-api-integration-framework>

- Developed a full-stack ERP platform integrating multiple business services through secure REST APIs, JWT authentication, and scalable backend architecture.
- Implemented webhooks, centralized logging, middleware, and error handling for reliable API communication.
- Built an interactive dashboard for API testing, monitoring, and integration management.

TaskFlow AI

<https://github.com/RajaNamdeo13/TaskFlow-ai>

- Built an AI-powered task management platform using OpenAI API for intelligent task prioritization and workflow automation.
- Implemented JWT authentication, Kanban board, reminders, and scalable REST APIs for secure collaboration.
- Designed responsive dashboards with real-time task tracking and productivity insights.
